Be afraid and do not let your heart be hard.
For where you look there you will go.
The eye sees what the heart wants to see.
Therefore, if you want to see what is right,
look at what is good and true.
If you look at what is bad and wrong,
you will end up seeing only that.
So, if you want to be happy,
look at the beauty of the world around you.
If you look at the ugly side of things,
you will only feel sad and angry.
Remember, your eyes are like windows
to your soul. What you see through them
will determine how you feel and act.
So, make sure to keep your eyes open
and your heart open to the beauty of life.

- This would suggest
that the new species
are derived from the
existing ones. The
new species are
more advanced than
the old ones - they
have more complex
structures and
more advanced
functions. They
have also developed
more specialized
adaptations to their
environment.
